

How to manually create a track ?

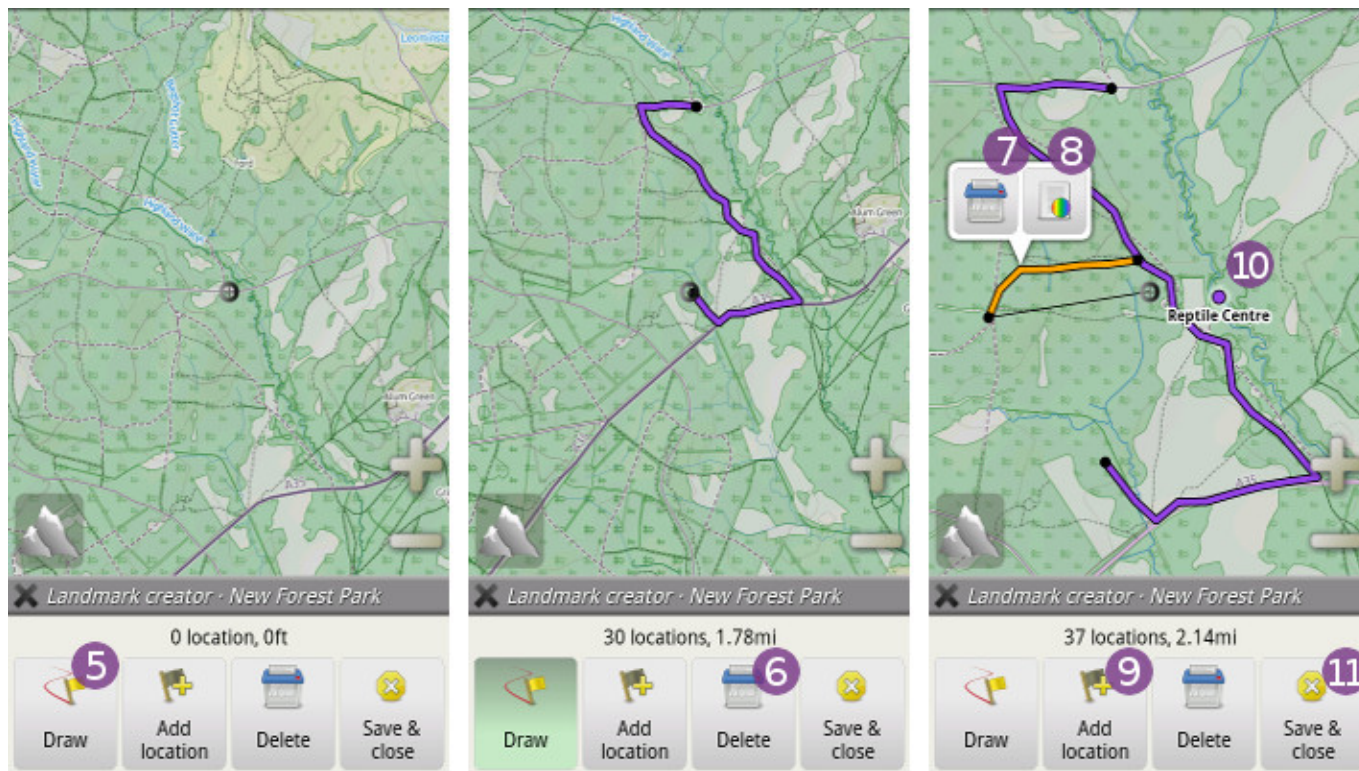

- Click on the “**Landmarks**” menu **1** and select the “**Create a landmark**” item **2**;
- Under the “**Local landmarks**” category, you can have a look at the current local folder in which one will be saved the route;
- Select “**Track**” **3**;
- If desired, enter a name for the track in the appropriate text field and change other properties;
- Click on the “**Ok**” button **4**.

The edit mode of the track is activated.

To add draw the track, process as follow:

- Move the map center over the location you want to be the start point;
- Click on the “**Draw**” button **5** to press it and start the drawing;
- Move the map center by following the path you want to be the track. The track is drawn on the map;
- If you need to delete the last locations, click on the “**Delete**” button **6**;
- When you have finished your track, click again on the “**Draw**” button **5** to un-press it and stop the drawing;
- If desired, you can move the map center to another location and draw another part of the track (track parts are called “segments”).

To delete a location at any place, click on it to display the actions pup-up, and select the **“Delete”** button **7**.

To change the color of a segment, click on any location of that segment to display the actions pop-up, and select the **“Edit color”** button **8**.

To add waypoints to the track, process as follow:

- Move the map center to the location where you want the waypoint to be at, and click on the **“Add location”** button **9**;
- If desired, enter a name in the appropriate text field;
- Click on the **“Ok”** button;
- The waypoint is displayed on the map **10**.

When finished, click on the **“Save & close”** button **11**.
